Credit Card Statement Parser - Assignment Brief

Objective

Build a PDF parser that extracts 5 key data points from credit card statements across 5 major credit card issuers.

Requirements

Scope:

- Support statements from 5 different credit card providers (you may choose which ones)
- Extract any 5 data points of your choice (examples: transaction info, card variant, card last 4 digits, billing cycle, payment due date, total balance)
- Handle real-world PDF statement formats

Deliverable: Submit your solution in whatever format you believe best demonstrates your work. Be prepared to demonstrate your work.

Evaluation: Your submission will be assessed on functionality, implementation quality, and how effectively you present your solution.

Submission: By Sunday **-** 9th Nov, EOD
